FLOOR DEBATE

April 10, 2002 LB 1309

ones that are in: Supreme Court is much the same; program 52 and program 67, those are concerning dispute resolutions, which is a very effective, cost efficient way for the court system to handle some of their cases. Same way with the Probation, which is a lot of it in the program 67, our Supreme Court reduce half of staff, those are probations. That helps us in our prison situation. The next one is under Medicaid, which is on the second page, program 348. Once again, notice they're all on 348. Earlier we had taken some of these cuts, and...but the way...and so some of those are still in there, others are not. They all have their areas, I will say. But, just hitting briefly, pharmacies are represented statewide, small town pharmacies as well as large ones, particularly on the dispensing fee. A very serious issue. Others, wholesale price list, 12 percent reduced drug payments. Many others have a huge impact on rural hospitals, that is provider rates. Or increasing the nursing facility rates. These have statewide impacts. Another override is, in particular, is the...we felt it was important to keep our word on developmental disabilities rate equity. Local assistance on transit, this is Omaha and Lincoln, but I think the body should understand that half of the statewide "handivans," of however you know them, senior citizen busses, whatever, are fully reimbursed for half of their expenses. The law also says that Omaha and Lincoln Metro's transit will be reimbursed to half of their expenses. The 600,000 represents, I don't know the exact number, but only a small number of what they actually are entitled to. That is the frank truth of that. So we...this represents only a small portion of our implied obligation to fund half of those expenses. But rural, re...the rurals, the "handivans" are getting pretty well up to their half in entitlement, per law. The soil and water approved projects under Natural Resources, program 307. One million six represents a commitment we made in three projects, out of that fund, that have just gotten federal accrual for dollars. And we would lose enormous amount of dollars, and I have to admit, I can't remember the number, if we do not continue the match, and have that project go forward. So it's almost to the point of being a construction obligation that we felt it was important to keep. Going on down, library aid is also a statewide issue. Small libraries as well as large libraries. It affects nearly every small town in the state.
